

< 30 seconds

Booksterilizer Pro

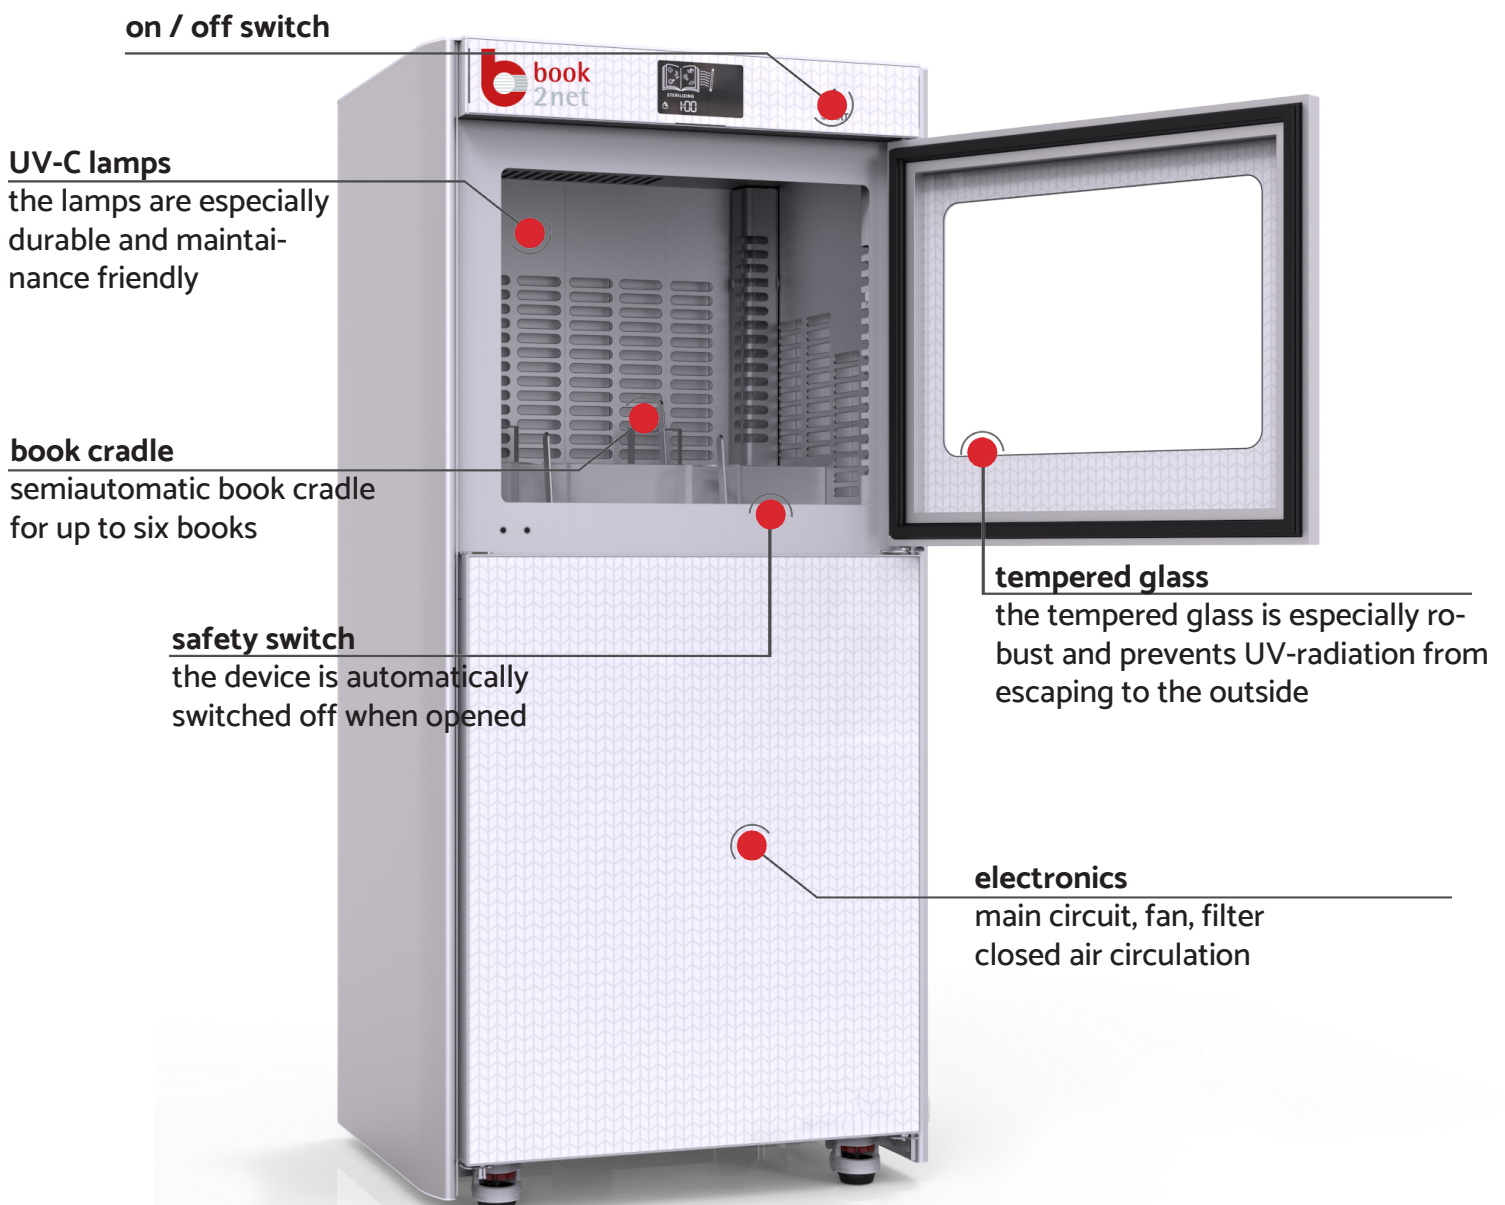

HYGIENIC, QUICK & SAFE

Booksterilizer Pro

Desinfect up to 12 books per minute

Various pathogenic microorganisms such as viruses, fungi and bacteria accumulate on library books and materials (magazines, mobile phones, tablets, purses and writing devices.)

The **book2net** Sterilizer eliminates pathogenic germs on books gently and thoroughly with UV radiation, creating a clean and safe reading environment - in just 30 seconds. Air that is not supplied from outside circulates in the interior. A gentle fan opens the books so that the UV light reaches each individual page and the dust is carefully removed.

on / off switch

UV-C lamps

the lamps are especially durable and maintenance friendly

book cradle

semiautomatic book cradle for up to six books

safety switch

the device is automatically switched off when opened

tempered glass

the tempered glass is especially robust and prevents UV-radiation from escaping to the outside

electronics

main circuit, fan, filter
closed air circulation
